DIRECTIONS

Residential Use: Before the first application of MANUGEST (each year), pour 2 buckets of water into each pit. Then sprinkle 1/2 cup (60g) over the mass. Repeat the dosage every two weeks. If odour persists, use 2 buckets of water before each application.

Commercial Use: Use double the amount shown above. For use in large parks or sewage lagoons, treatment of 1 - 2 bags per week may be required until mass and odour are sufficiently reduced.
